**ZWIEBEL**

# ZWIEBEL, YOUR PARTNER SINCE 1828

Léon ZWIEBEL 1848-1932

Based in the heart of Europe, a few kilometers from Strasbourg, ZWIEBEL has been specializing in the manufacture of copper alloy parts since 1828.

Both our sand foundry, machining and bar turning workshop enable us to make subcontracted industrial parts used in all sectors of activity.

The family business kept his human scale (60 employees) and has evolved over time based on the values that have always been its greatest strength.

The expertise and professionalism of its personnel, the unceasing will to modernize, and ability to react rapidly to your needs make ZWIEBEL a competent and reliable partner to enable you to respond to market requirements.

CERTIFICATE ISO 9001  
VERSION 2015

€ 45 %  
OF EXPORT

60  
employees

4000 m<sup>2</sup>  
of covered surface area

# MANUFACTURING MASTERY

## THE DESIGN

Our experience and variety of proposed alloys gives us the opportunity to support you in your material choice.

Our technicians and engineers equipped with the CAO stations will advise you in the design of your products allowing its easier industrialization and costs optimization.

The development of business-specific software allows us to

master the technical data and assure the maximum traceability of our processes.

## PATTERNMAKING AND STORAGE OF PATTERNS

Patternmaking workshop assures creation, reproduction, plating and maintenance of patterns.

Those are stored outside of the production zones in the controlled environment, events history is traced in our database.

## CORING (PHENOLIC COLD BOX)

- 2 Coring machines Roper H12 automatic tool ducted
- 1 mixer with the quick screw type MICRO VR capacity 1t/h with additives management
- 1 batch mixer of 50 liters for special sands preparation (chromite, kerphalite...).
- 1 new sand silo 30t with pneumatic conveying
- Coring coring and Polyurethane Cold Box in outsourcing

## CASTING GREEN SAND AND AIR SET

### SQUEEZE/AIR HWS

- 1 HSP/1 Heinrich Wagner machine of 30 molds/h capacity
- Frame format 670x470x200

### Chemical

- 1 rapid screw 6t/h BMF
- Standardization casting in 3 frame formats :
- 450x350/600x600/760x760
- Occasional use of format 1000x1000/1000x2000
- No-bake casting, horizontal or vertical joints

## MELTING ELECTRICAL, FUEL OIL AND GAS

- 2 furnaces 500 kg (fuel oil)
- 1 furnace 500 kg (Natural gas)
- 2 furnaces crucible Push out induction (200kw)
- Hand casting on stretcher ladle 150kg

## FINISHING FROM DESANDING TO FINISHING TOUCH

- 1 shot blasting machine SISSON LEHMANN plate type Ø2000mm
- 1 Pendulum saw (Ø500)
- 1 Table saw (Ø305)
- 2 Grinder reels (Ø500)
- 3 finishing workstations with pneumatic tools

## MACHINING WORKSHOP CNC AND CONVENTIONAL

Strong technical know-how in the area of traditional and numeric machining. We have the latest and effective production means to satisfy your needs.

Machining workshop has 7 CNC machine :

- 2 MORI SEIKI Ø 420/250/400 mm
- 2 MORI SEIKI Ø 420/350/1100 mm
- 2 INDEX ABC Ø 65/150/150 mm
- 2 INDEX G300 Ø215/250/250 mm

Together with 2 conventional turning machines :

- RAMO Ø 600/450/1450 mm
- CAZENEUVE Ø 400/450/600 mm

Milling machine HURON (table 1435x460mm).

Drilling machine SERM CP40L (table 635x255 mm).

For bar turning we have 2 bar suppliers with capacity of 3000mm and 2 others with capacity of 1000mm.

The tools are gauged with use of pre-adjustment table ZOLLER SMILE 420

Some of the CNC machines are equipped with the integrated measuring arms.

## CONTROL METROLOGY

With 800 instruments in stock, metrology service has the controlling means which are calibrated periodically.

These are mainly the traditional controlling equipment:

- Caliper
- Depth Gauge
- External Micrometers
- Internal Micrometers and Bore Verification
- Gauge Blocks

In the cabin, control is done using the height gauge TESA MICROHITE on the marble 1000x630; height capacity 600mm.

Two roughness meters MAHR, hardness meter and ultrasonic thickness meter are completing our large instruments offer.

# OUR MAIN ALLOYS

Grades	Chemical composition										Norm	
	Cu	Sn	Pb	Zn	Ni	P	Al	Fe	Mn	Si	Numerical designation	FR or EU

## BRONZE

other alloys on demand

## CONTINUOUS CONTROL OF OUR PROCESSES

We conduct several controls during the realization phase to reach maximum quality.

Our principal tools:

- Spectrometer
- Durometer
- Sand laboratory control
- Sheathed pyrometer
